LAURA MARSH has worked in children's publishing for nearly twenty years as an editor, packager, and currently as an author. She has written fourteen books in the National Geographic Kids Readers series, including the Great Migrations books. She currently lives in Westchester County, NY with her husband, two sons, and their dog Bode. The author lives in New York.

Very informative. My kindergarten students read this together and wrote a short report based on the information. They enjoy reading these national geographic books and seem to retain the information well. It's nice that important vocabulary words are placed in text boxes to discuss as you read aloud. A lot of text features found as well so great to reinforce those elements of a text.

This book was the main shared reading piece for my polar bear unit in class. It has great information and pictures!

Perfect for a first grade research report on polar bears.

This is a good book for building reading confidence. The story provides a lot of information about polar bears, Where they live, what they eat (without being too graphic about their predatory nature). Almost all of the words are sight words or at least a child can sound them out fairly simply. The photos of the bears are amazing! My son was so happy that he could read this entire book by himself with minimal help from mom.

Nice

We own several National Geographic Readers. I found the Polar Bear issue was very informative and will be a good reader to start with. I found this particular issue to be the best Level 1 Reader.

More like a booklet than a book -- flimsy paperback.

I gave this book to my granddaughter along with a certificate from World Wildlife Fund for the adoption (a donation which will help the Polar Bears). The book is simple format, and includes questions for children. When her school starts, she can tell the class about her gift, and share this book with them. She was delighted. I plan to do the same for my other grandchildren on their birthdays. It was the "hit" gift.
