Customer Reviews

I purchased this eBook because it was a requirement for my nursing course. In my opinion, it is very informative and interesting. This eTextbook provides very detailed information about how to become an effective educator (as an RN and in general), so that the learner's (a patient or a student) acquired knowledge is at her and/or his optimum level. In short, this eBook is an excellent tool which helps design a very effective teaching plan that is tailored to the specific audience (i.e., based on the learner's age, literacy level, environment, motivation, etc.).I only give four stars because the tables, pictures, and diagrams in this eBook are a little blurry, however still readable.

Needed it for school.

this same book also come with a green cover with medical symbols at th bottom
