Customer Reviews

"This book is a 'must read' for anyone training to be, or already serving, in a professional role in today's multicultural society. It is important, accessible, and filled with lively case examples. I recommend this book as required reading for graduate and undergraduate courses and for professionals who work with clients or carry out research in any mental health or human service setting."--Sandra A. Graham-Bermann, PhD, Department of Psychology, University of

Michigan "This work is an essential addition to the library of professionals who conduct nearly any kind of interview. Its careful strategies for respecting and negotiating so many different aspects of cross-cultural interactions are invaluable. Fontes's reputation in the field is top-notch, and with this book she provides the best, most current interviewing guide I have seen."--Sharon W. Cooper, MD,

FAAP, Department of Pediatrics, University of North Carolina School of Medicine"Interviewing is often taken for granted in professional training programs, and as a result many of us are not exposed to ways of negotiating cultural differences which can make the difference between success and failure in this important relationship-building activity. No matter what your professional training and background, you will benefit enormously from the rich material and interesting examples in this book. I highly recommend it as a course text for teaching students to conduct a sensitive, effective, and culturally informed interview with clients from all walks of life who are seeking our help."--David A. Wolfe, PhD, RBC Chair in Children's Mental Health, and Director, Centre for Prevention Science at the Centre for Addiction and Mental Health, University of Toronto"Today, helping professionals must think globally; we need tools to interview and assess racially, ethnically, culturally, and economically diverse clients. Fontes's book is timely and informative. Drawing on the research and practice literature, her personal experience, and that of other professionals who provide culturally sensitive services, she offers much-needed, practical advice about how to avoid pitfalls and conduct successful interviews that span the cultural divide between professional and client."--Kathleen Coulborn Faller, PhD, ACSW, Marion Elizabeth Blue Professor of Children and Families; Director, Family Assessment Clinic, School of Social Work, University of Michigan"This extremely helpful and instructive book has amazing breadth and depth in analyzing the interview process from beginning to end. Fontes provides guidance on all aspects of preparing for, conducting, and documenting interviews, interweaving cultural issues throughout. She shows tremendous sensitivity and good sense in helping readers handle cultural differences and dilemmas. Highly readable, the book is suitable for everyone from students to practicing professionals."--Stanley Sue, PhD, Distinguished Professor of Psychology and Asian American Studies, University of California, Davis"This accessible practitioner's guide tells it like it is....Fontes brings to the fore our focus on the need to be more ethically and universally minded, cultural challenges that are pre-requisites if we, as therapists, wish to develop a more purposeful relationship with our clients, whether they are children or adults, from the diverse cultures of the globe....Documents each strategy in navigating the best route for intercultural working. Be you student or established therapist, this book will open your eyes. Essential reading!" (The Independent Practitioner 2009-07-03)"A practitioner's intervention guide for gathering information and building healthy relationships with new clients....The text is well organized and would be a very effective resource for graduate counseling students, novice counselors, as well as seasoned professionals who truly want to understand the dynamics of working with culturally diverse populations. She provides a clear examination of ideals appropriate for interviewing in the context of health,

demographics, and socioeconomic status that must be addressed from a multicultural perspective. With the country becoming more and more diverse, Dr. Fontes' book is promising and timely." (The Family Journal 2009-07-03)"Lisa Aronson Fontes has a wealth of knowledge, experience, and skills in working with, writing about, and researching cross-cultural issues in different contexts....I was able to align ideas in the book with systematic concepts such as the self of the therapist, multiple perspectives, the importance of context, social constructionist approaches (including the importance of language and meaning, both spoken and unspoken) and the therapeutic alliance." (Journal of Family Therapy 2009-07-03)"Provides specific guidelines for dealing with language competence issues as well as other relevant topics....The author advises readers well....The author also offers advice on diverse issues that are relevant during and after the interview....Taboo topics are well presented and include substance abuse and child abuse....At the end of each chapter is a list of questions and recommended readings. These may also be useful for teaching purposes in academic settings." (Journal of Clinical Psychiatry 2009-07-03)"Deftly blends general principles, clinical anecdotes, and information about specific cultures. It strikes the right balance between practitioners' desire to know specific facts about the culture in which they most frequently interact and the need to provide general principles that will help practitioners to become aware of their own cultural biases and to work with clients from any culture....Throughout her book, Fontes maintains a broad focus and includes material of relevance to varied disciplines....Even more impressive is Fontes' ability to discuss sensitive matters of race, ethnicity, class, and language in an honest, informative manner. The reader feels welcomed, whatever his or her degree of comfort and knowledge, and is gently yet firmly taught how to work more effectively with clients from different backgrounds. Readers with little experience interviewing clients from other cultures will be given a framework in which to get started: knowledge about degrees of acculturation, things to think about when preparing for an interview, and how to build rapport....Each chapter includes questions for further thought and discussion, which could be used in teaching and supervision. I recommend this book highly to practitioners of any discipline." (Bulletin of the Menninger Clinic 2009-07-03)

Fluent in Spanish and Portuguese, she is a frequent conference speaker and workshop facilitator.

This is the first book I have read on this subject. I found it very fascinating and helpful for work and daily life. There was tremendous global diversity shown in the subject matter. I only wish there had been more written on Americans (not recent immigrants), who can have widely different cultures depending on any number of factors. Hopefully, a future edition will add more. Aside from that, I will continue to utilize this as an insightful handbook on a complex subject. The writer clearly has tremendous experience.

This book is a "must read" for anyone seeking to increase their cultural competency!! As a social worker, I found this book to be a great help for relationship-building with clients of culturally diverse backgrounds. It is well-written, easy to follow and uses great examples! Anyone that works with a diverse clientele will benefit from this book!

I used this book for my class. It introduced the complex task of multicultural counselling in a sensitive respectful way. Each case study was presented clearly with well written discussion afterwards.

Perfect condition

This was a great book and very helpful in using with clients from different cultures than my own. It gave great perspective!

This book really helped me learn what is and is not expected when conducting a therapy session. Great tips and very helpful. Book discusses many things that people dont think about and is a fairly easy reader. Thanks!!

This is one of the best books I've read on this subject and I highly recommend this for everyone who works with diverse clients

Too boring for me and I strongly think that you will get a better investment from Caring for Patients from Different Cultures.
