Customer Reviews

This guide is an excellent resource for anyone preparing for the CLEP Bio exam. All of the information is presented well and is easy to find. I thought that the organization was well done and easy to follow. There are a lot of graphs, charts, and other visual reference material that gave me a much better understanding of the concepts that I needed help with. I feel like I have a great idea of what I can expect on the actual test and feel more confident about my skills. I loved that this guide came with two practice tests that not only gave an answer key, but details explaining precisely why each correct answer was selected. This is a current edition and was very competitively priced. I feel like this has been a great investment and I would recommend this study guide to others without hesitation.

This is a really good, comprehensive book. As an instructor I am always looking for study guides to recommend to my students, and I really like this one. It is a good-sized book and includes several sections. It goes into detail in each section with examples and practice questions. What I really like about this book is that it explains the answers. Having a book that gives you the answers is one thing, but if you don't understand HOW they got that answer you are still going to be confused. It has practice tests along with over 200 sample questions, which I think are a great representation of the actual test. I have purchased other books from Accepted, Inc. and as usual, they nailed it with this one. There is no "fluff" material in the book, just the straight-forward information you will need.

It is always nice when you can find a good study guide that is affordable. This guide is well set up and very easy to understand. It informs you of what is on the exam, How it is scored and how it is administered. I am a visual learner so the graphs and charts in this book help me to visualize what I am learning about. The practice tests are a great help. Having this book has helped to boost my confidence a lot. The multiple choice questionnaires at the end of each section are a great way to make sure that you really do understand what you are being taught. If I get something wrong, I know

right away and can go back and re read, that is better than reading through a study book and just thinking that you understand. By the end of this book, you will know if you understand.
