Synopsis

Was it just a cell phone swap or fate? It's bad enough when high-school senior Keeley mistakenly swaps cell phones with a stranger. It's even worse when the stranger turns out to be an obnoxious, self-centered boy named Talon who's just left for football camp with her phone. Reluctantly, the two agree to forward messages for a week. As Keeley gets to know Talon through their texts, she finds out he's more than just an egocentric jock. In fact, the two fall for each other, hard. But Talon has been keeping a secret. One that makes their relationship all but impossible. Will Keeley ever be able to trust him? This romance offers high-school drama, humor and heart, plus a love story that will sweep you away.

This was refreshing :) I don't read a lot of these kind of books mostly cause I don't find them a lot and cause the ones I do find with this "switched phone scenario" gets annoying cus the messages between characters are either too bland or too raunchy. But with this book the dialogues were cute and sweet. Not a moment past, where I wasn't smiling or laughing. I started reading this early this

morning and finished it the same, so if you're looking for a short, sweet rom-com, read this one.

I had high hopes for this one. I bought it right before a camping trip and planned to read it (and others) on that trip. I read a similar book to this one right before reading this one that was such an emotional impact for me that this one just fell short on the emotions. I did like it. It was a light and cute read. But it was missing some depth. I know that this book is popular due to it being on another site for a while before being published, which made me feel like it would be better than it was. Really my opinion just could have been the perfect storm of reading a wonderfully emotional book and finishing it hours before picking this one up combined with expecting more. So your results may vary. I just wouldn't read it right after reading a book that you have fallen in love with.

I love this idea of meeting someone through a phone switch. If they would have met face to face first they wouldn't have happened. They grew so close through texts that others' opinions or beliefs didn't have the ability to tear them apart.

I really loved this book! It was fun, touching and the characters wonderful and I just couldn't put it down. A truly wonderful YA book. I really look forward to reading more books by this author.

The story begins with a cellphone swap between our two main characters, Keeley and Talon, who seems like an obnoxious jerk, the story escalates from there. Overall, it is a fun read. I like the close relationship between Keeley and her twin brother, Zach, how they were close together but kind of grew apart as they got older, I know how Zach feels first-hand, like you can't let anyone down, still you need someone to be there for you when you're down, therefore he tries to salvage the relationship between siblings. Back to our main couple, I like how the author implies that there are two personas for the two main characters, their cellphones are a window to their real personality opposed to the one they put up for the real world. There is just one thing that I have a problem with, that is how some problems in this story were dealt with, but the outcome in the end was quite unexpected and pretty cool. I really like this book and the chemistry between its characters. Would I suggest it? Yes.

The story concept was great and I was super interested in reading the book but the execution was just okay. I enjoyed reading Talon and Keeley's text conversations and interactions once they met but several of the characters and parts of the plot lacked depth. Ultimately this book makes for a good

beach read but nothing more.

Not too angsty or overwrought. Good, cleanly written characters that you can care about. Keely is overshadowed by her brother but the chance loss of her phone allows her to step out of his shadow and find her own voice. Talon is able to find a bit of redemption and love- all because of misplaced cell phone and unexpected chemistry through texting.

So since reading *Textrovert*, I've found out that this was originally a semi different story than what it is now. It seems like a lot of people are judging this work based on Lindsey's old work and that just doesn't seem right to me. So I just want to start off by saying, if you decide to read this book you should go in to it with an open idea, because from what I understand it's not the same as her original work on Wattpad. That being said though, *Textrovert* was exactly the cutesy contemporary read that I was looking for. I have to say that Keeley really did pull me in from the start. Being in the time that we are and knowing that a lot of relationships start out online, I felt like this was such a cute way to look at things. How often do you accidentally switch phones with someone, let alone neither of you have a password set up! I mean come on, it's just fate. So when Keeley and Talon start being forced to talk to each other to relay messages and we see their relationship actually become more than acquaintances I was beyond excited. Especially because I knew at some point these two were going to have to meet, unlike most online relationships out there today. That little added bonus of knowing that there would be a physical meeting made me want to speed through the entire book. Surprisingly enough, them switching phones is just the beginning and there is SO MUCH more story afterward. Which made me even more excited because the more I read the more I wanted to see what was going to happen. I'll be honest, a lot of the plot twists in this were very predictable for me, but the way that they were handled was not so predictable. Plus there was one at the end that completely threw me but I very much like the way it was handled. All in All *Textrovert* is a very cute summer read that you are going to want to get your hands on. Keeley is such a likable character even with all of her supposed flaws, Zach is the annoying brother character that most of us all know, and Talon, oh Talon, even with his crazy flip flopiness he is still a heart throb that every time he said the words baby doll my stomach did little flips. If you haven't already, I'd suggest grabbing this book for a quick and super cute summer read!
