# Electricity And Basic Electronics

## Synopsis

Electricity and Basic Electronics teaches basic theory and fundamentals and is a starting point for careers in electronics. The text is clearly written and highly illustrated, making it easy for beginners to understand. Numerous examples walk students step-by-step through circuit analysis where applicable. The Practical Application features cover topics such as breadboarding, soldering, and reading voltage on an oscilloscope. The Project features allow students to build items such as a continuity tester, blown fuse indicator, and power supply. Math Focus features provide students with a quick review of the basic math skills they need to understand the topic at hand. Math topics covered are exponents, scientific notation, metric and electrical prefixes, order of operations, algebraic equations, adding fractions, ratios and proportions, and square roots. A chapter called "Energy Conservation" covers ways to conserve energy and alternative forms of energy.

## Book Information

Series: Electricity and Basic Electronics (Book 8)

Hardcover: 448 pages

Publisher: Goodheart-Willcox; 8 edition (June 12, 2012)

Language: English

ISBN-10: 1605259535

ISBN-13: 978-1605259536

Product Dimensions: 8.5 x 1 x 10.9 inches

Shipping Weight: 2 pounds (View shipping rates and policies)

Average Customer Review: 3.0 out of 5 stars 8 customer reviews

Best Sellers Rank: #201,153 in Books (See Top 100 in Books) #18 in Books > Engineering & Transportation > Engineering > Electrical & Electronics > Superconductivity #48 in Books > Science & Math > Physics > Solid-State Physics #369 in Books > Engineering & Transportation > Engineering > Electrical & Electronics > Electronics

## Customer Reviews

Stephen R. Matt received his BSEd and MEd from Wayne State University and his PhD from Michigan State University. He has taught various courses in electricity and electronics at Michigan State University and the University of Georgia, as well as curriculum design courses at the University of Manitoba. He has also served as the Vocational Director of Barrow County Schools, in Winder, Georgia. He has worked in industry as a technician for a tubing manufacturer, a training

specialist at Ford Motor Company, and a training director for Philco-Ford Corporation. He is currently working as a consultant, serving companies such as A2D Technologies and Generate Technologies. He is married to Theresa and has two daughters and a stepdaughter. Dr. Matt has been living in Athens, Georgia for the past 30 years.

The front cover is deceiving and actually incorrect-it shows the hardcover, as well as the 3D model's side looking thick, looking like a TEXTBOOK not a work book.

wording was clean and visible was new as stated it did not look like if it was made in china maybe japan but not china. good s\*\*\*!!! did not rate 5 cause i was expecting it to arrive sooner but came in within its time line.

Book was in amazing shape!

This item is really useful... I love it

Delivered on time! Awesome!

first this wasn't the book I expected, this is a work book, not clear in the ad, and second took a long time to receive and see that I bought the wrong one ...

OFFICE CHAIR support long sitting comfortably. I ordered 5 and return all 5 with a lot of extreme hassle as I could not rest my head to relax after hours of sitting

The book in the picture is not what you are buying, it's a workbook that looks nothing like the picture. Which is false advertisement. They want me to pay for return shipping and I will not do so which I think is what they are counting on but they should be punished for false advertisement.
