Fish Eyes: A Book You Can Count On

Synopsis

Now toddlers can dive into counting with this board book edition of one of Lois Ehlert's most popular books. With cutout fish eyes to touch and an energetic fish friend to guide them, they'll have so much fun they won't even notice they're learning!

Shipping Weight: 2.4 ounces (View shipping rates and policies)

Average Customer Review: 4.4 out of 5 stars 50 customer reviews

Best Sellers Rank: #125,800 in Books (See Top 100 in Books) #120 in Books > Children's Books > Animals > Fish #257 in Books > Children's Books > Early Learning > Basic Concepts > Counting #6734 in Books > Children's Books > Literature & Fiction

Customer Reviews

"Flashy fish" in Ehlert's typically electric hues swim through this imaginative counting book. Ages 2-6. Copyright 1992 Reed Business Information, Inc. --This text refers to an out of print or unavailable edition of this title.

PreSchool-Grade 1-- Stylized fish shapes in flat, razzle-dazzle colors against a dark blue background float across the pages from one to ten, accompanied by one little dark fish who keeps the count going. Cutout circles at the eyes reveal colors on succeeding pages. The slight text, occasionally in rhyme, introduces adjectives through the count, and tries to set a context of wish-fulfillment. It's a slick production, attempting several concepts at once--numbers, shapes, colors, imagining, addition to a value of one--but it doesn't quite hang together, and its result is a little breathless. MacDonald and Oakes' Numblers (Dial, 1988) also uses strong color and stark form to present visually the concepts of increasing quantity and transformations, but in a more thoughtful and well-integrated way, with movement inherent in the design. Another little dark fish, Lionni's Swimmy (Pantheon, 1963), has a more meaningful underwater exploration, incorporating the idea of

changing appearances into the story. --Karen Litton, London Public Libraries, Ontario, Canada

Of all the counting books I purchased for my grandbaby, this book was her favorite counting book. Please don't ask why because even I don't understand. Whatever works when it comes to learning experiences I will invest in my grandbaby's interest. Personally I liked the gorilla counting book but hey, that's me.

My 3 year old got back from preschool one day and asked for this "fish book" that Miss Beth had read to them in school. I emailed the said teacher and promptly received an prime shipment two days later of this book full f beautiful fish....stripe fish, dotted fish etc. I love the colors in the book and the numbers counting educational aspect of it. It reads really well and my son asks me to read this to him everyday. Highly recommend!

I gave it to my 22-months-old grandson for Easter. He liked it so much, he made the rounds of family members with it, saying, "'Gin, 'gin." That's 'please read it again' if you're not familiar with toddler talk! He's able to count to four and he knows his colors so it provided a lot of opportunities for wowing us. It's a sturdy book and I believe its one that will grow with him as he masters more numbers and begins to recognize more details.

I read this to preschoolers before an art project. They really got into it. Lovely and simple images, and concept. (The small brown "additional" fish is a bonus, which the older children caught on to quickly.)

A great book for little ones and quite beautiful, too. Speedily delivered and then much enjoyed.
Thanks!

A perfect beginning to count book! the bright colors, the imaginative shapes really catch the imagination of the youngest counter. Highly recommend any of Ehler's picture books, which appeal to readers from the very youngest to the beginning reader.

Nice book when kids are learning math, it help to develop their skill counting.

Very Good
