Fundamentals Of Clinical Supervision (5th Edition) (Merrill Counseling)

Synopsis

Fundamentals of Clinical Supervision, 5/e offers a comprehensive, interdisciplinary presentation that makes it the most highly cited publication in the field. Addressing essential topics for supervisors, it has earned a reputation as an authoritative resource for anyone seeking certification as an Approved Clinical Supervisor. Emphasizing central themes from a variety of mental health professions, the book covers supervision models, supervision modalities, administrative issues and professional concerns. This Fifth Edition covers the latest research, more on second-generation models of supervision, a new section on triadic supervision, and the latest on technology. Its one-of-a-kind supervision toolkit, scholarly approach, and topic coverage set the book apart.

Its one-of-a-kind supervision toolkit, scholarly approach, and topic coverage set the book apart. New to the Edition: New coverage of "second-generation" models of supervision complete with a conceptual map tying them to the first

generation models. New theoretical and empirical information across all topics from all relevant mental health fields. Updated chapter on multicultural supervision reflects the growing sophistication within the mental health disciplines around cultural issues. A new section on triadic supervision is presented as a subset of individual supervision. New sections on technology show how it can assist supervision for both individuals and groups. More on counseling supervisees on professional issues such as competence and remediation. New tools in the Supervisor's Toolbox including an updated supervision contract and updated ethical standards. Also from Janine M. Bernard and Rodney K. Goodyear: *Fundamentals of Clinical Supervision, 4/e* - ©2009

Janine Bernard is Professor of Counseling and Counselor Education at Syracuse University. She is also a Fellow of the American Counseling Association and has received ACA's Arthur A. Hitchcock Award for professional service. She is a former Board member and Chair of the National Board for Certified Counselors. She has been involved with CACREP, the accreditation body for counseling programs for over 25 years. In addition to her writing on the topic of clinical supervision, she has presented workshops and delivered plenary addresses in Europe, Asia, and Australia, as well as throughout the U.S. and Canada. Rodney Goodyear is a Fellow of the American Psychological Association and of the American Educational Research Association. Currently at the University of Redlands, he is a University of Southern California Emeritus Professor, having directed the USC counseling psychology program for 20 years. He has served on APA's Continuing Education Committee and its Commission on Accreditation and has received the Council of Counseling Psychology Training Programs' Award for Lifetime Contributions to Education and Training in Counseling Psychology. He served the American Counseling Association as Editor of its flagship journal, the *Journal of Counseling and Development*. He has just completed an appointment with Yonsei University as a Fulbright-Yonsei Distinguished Lecturer.

The big problem is that at least one chapter and probably other text has been omitted. This is a problem when this is being used as a textbook for a class. I may have to buy another version to pass my class and I'm not happy to have to buy two copies of the same book because they did not post that they were different versions. They are both 5th Edition, but not the same version or publisher. This is a version of this book that says on the back (which you cannot see before ordering) that it was imported into the US and Canada without the permission of the Publisher or

Authors. It is apparently a version that was intended for use outside the US and Canada.

This was a fine book. It laid out key issues and principles very clearly, but I thought it lacked attention to multiculturalism and social justice. The discussions of these issues were minimal, at best. Though the text does present the nuts and bolts in a clear, cogent fashion, it lacks nuance and depth, overall.

This is a fabulous text. I have been using it for over 10 years and get the new edition each time it comes out. It offers multiple modalities of supervision and covers everything from how to set up a quality supervisory relationship to dealing with problem supervisee issues.

For those supervising students doing clinical work this is a must have. Believe it or not there is much that is not known regarding supervisor, but this book provides a good foundation based on what is known.

The book is not the most updated version. The chapters are not correct like they are in the hardcover.

A good resource for reflecting and learning the basics about clinical supervision in a multicultural society. Easy to read and full of examples that help connect the reading with real life situations.

This book has great information, and a wonderful toolbox for supervisors. The problem is the book is also very dense, and I find it difficult to read for more than 10 minutes at a time.

This book is not kindle compatible. :(
