Customer Reviews

Kessinger Publishing reprints over 1,500 similar titles all available through [.com](#).

I was originally looking for another book from Jinarajadasa and ran into this one. I am happy I decided to get it. It is very in depth with many aspects of philosophy and a great addition to any collection.

Many typos. No diagrams in printed version although an e- version available with purchase. Still a very interesting and enlightening book.

Jinarajadasa was a disciple of C.W. Leadbeater, one of the clearest and most-prolific theosophical writers of the late-nineteenth and early-twentieth centuries. Although lauded as an Initiate and clairvoyant, Leadbeater and his colleague, Annie Besant, departed from the original teachings of Helena Petrovna Blavatsky, the central figure in the founding of the Theosophical Society, and the instruction of her Masters. They continued to utilize much of the original terminology, but altered the

underlying philosophy into a system significantly at variance with the original. It is this system, sometimes called, "Neo-Theosophy," which Mr. Jinarajadasa presents here. It is a clear and readable account of the Leadbeater-Besant map of the universe.

As a student to theosophy, this book came highly recommended. I would like to continue the recommendation except I cannot and that has nothing to do with the book but the reprint I purchased from Kessinger Legacy Reprints aka Kessinger Publishing LLC. Unable to contact this alleged publishing company to complain about their shoddy workmanship, with incorrect margins making it impossible to read the far right side of the left-hand page and the left side of the right-hand page due to the binding, I have little choice but to warn potential purchasers of this book to stay away from this publisher. If I am able to contact them, I would like my money back for this unreadable book that they shoddily published.

Love this book. Great information in a palatable context. A little book packed with a lot of concepts.

Jinarajadasa dedicated his entire lifetime to "the work" and this 500 page plus tome is a monument to his dedication and ability to share these important principles with us. A masterpiece of Theosophic philosophy!

I wasn't sure if this was from a S. King writing or some child night mare of a writing! It's obvious that any one can write then have that book published. Only the most outrageous of imagination could come with this fairy tale type of fantasia. Sorry, but the author is searching for the truth in the wrong place! you know?
