Customer Reviews

I bought this kindle book for my 12-year-old grandson. He read it rather quickly it, which says a lot. He's a very good reader but a very picky reader. The story has to be genuinely engaging for him to read it. So, based on my grandson's review, I've given it four stars. Bear in mind that book reviews (like movie/play reviews) are based heavily on opinion. Other reviewed items have concrete qualities that the user can point out to validate the review. However, given the subject matter of this

book, it's probably a good read.

Rather than picking up a boring history book, pick up a copy of an I survived book, because that will interest readers a lot more than a textbook. Even now, whenever we are learning social studies in class about a historical event such as the destruction of Pompeii, I will go home and read Laurens book from beginning to start to get a better understanding of the topic. Laurens books are historical, cultural, relatable and pure amazing, so go read the book because you haven't lived until you read the I survived series

Our 7 year old grandson is hooked on this series.. He doesn't choose to read - but this book definitely kept his interest and attention.

I thought this was an excellent and very interesting book and was a great topic to learn about. It was very sad but is very interesting and true. I am always interested to learn about nonfiction topics such as the Titanic. I love reading the I Survived Books.

Grandson and I loved the story. Just found out about this series. We will read more of them!

I bought this book at a scholastic book fair for my then 8 year old daughter and she really enjoyed the book. She had been requesting the rest of the series once she found out there were more books. I bought my nine year old daughter the full series and she loves the books. She has read them all two to three times and shares them with her classmates as they take turns taking them home to read. She talks about the events all the time and how amazing it is that the people survived and has intrigued her interest more with the types of natural disasters that occur and incidents of mass casualty such as the sinking of the Titanic. Great books.

My daughter was reading this book for a book report for school. She is 10, and she absolutely loved it. I decided to read it as well, since she enjoyed it so much. The historical facts are interesting and you feel as if you know the characters. It is very well written and a page turner. Highly recommended for a historical fiction read.

Arrived on time as it was a gift for my Kid. Loved it.
