## Customer Reviews

"If you're serious about diving in Southeast Asia, then this guide will give you a wealth of countryâ ”and region maps, as well as ample details on the underwater topography and marine life you can expect to see." â ”Indie Traveller"Useful essays on local liveboards and marine life offer some excellent insights and 25 per cent of the book is dedicated to practicalities, with lists of

contacts and need to know information about health, visas, emergencies, money, weather and what to bring – all useful stuff. Overall an excellent addition to our dive guide library, which could well become a classic. It's certainly got us planning our next visit to the region." – "Dive Magazine" "Diving in Southeast Asia provides a useful starting point for planning a trip. It provides maps spotting the locations of sites and brief tabulated summaries for quick reference. Every page is adorned with a colorful picture generally taken underwater. From marine life suitable for super-macro cameras to WWII wrecks draped in corals, from whale sharks to pigmy seahorses, it's all covered."

– "Undercurrent.org" "Tuttle has specialized in books about Asia for nearly 70 years, and its experience shows here. The writing succeeds in getting a flavour of the underwater experience and character of individual sites and regions, rather than being a catalogue of facts and figures. And another welcome aspect is the collection of detailed maps marked with individual dive-sites, which I for one will find helpful in future." – "DIVER Magazine"

Sarah Ann Wormald is from Ilkley, West Yorkshire in the UK where she previously worked as a Solicitor. Sarah began diving in 1999 in the Red Sea in Egypt and after having dived in numerous destinations around the world she moved to Indonesia in 2007. Since her move to Asia, Sarah has become a Instructor who has shared her passion with hundreds of students through teaching them how to explore the underwater world. When Sarah is not teaching she spends her time traveling Indonesia diving and photographing. From the outset of this project Sarah's aim was to promote operators who dive safely and who protect and care for the reefs around them. Sarah's interests in Indonesian reefs, marine life, adventure and exploration led her to begin working on this book in 2013. Sarah currently lives and works full time in Indonesia.

Glad to have a diving book for this part of the world. It could be better (some sections are severely lacking information), but it's a large part of the world to cover in just one book.

This guide is out of date and it does not give enough practical details about the dive sites. We could not understand how to get to the dive sites, flight details, where to stay and so on. Not that useful without the country travel guides.

got this for a pending dive trip to the Philippines in 2013 & Thailand in 2014-this book covers them both.

Very informative, nice photos too. Aided me in deciding where I'm going to go in that part of the world next summer. Arrived quickly and suitably priced.

Picking this up was a spur of the moment decision and one I'm quite happy with. As only an occasional diver (pesky right eustacian tube) there isn't much chance I'll get to even a quarter of the sites listed here but by golly there are a lot. All sorts of mouth water bits of info are slung the readers way and if you want some inspiration for your next dive holiday then flicking through this book is certainly a great way to make your credit cards quake in fear. As to specifics, the book is well set out, nicely presented with lots of lovely photos and has plenty of information for budding dive holiday takers. Of course in any work of this kind there is always going to be the issue of information becoming out of date and therefore you really shouldn't take every contact detail etc provided here as gospel, but for heavens sake you are going to do some checking of this sort of stuff before you go so it's unlikely to ruin your holiday. There is a reference section included with contact details and further reading as the icing on the cake and really, the main reason I'm giving this only four stars is due to the inherent risk of obsolescence in such a work and also the fact that nation specific guides are now available for most of the countries mentioned in briefer format in this catch all work.

This book is Pre -tsunami. & Pre-enviromental-ban for Sipadan

CONS:1) This edition is basically the same as the 2nd edition. If you have #2 then you don't really need #3. Just call ahead and make sure the LDS info is correct.2) Although some of the information may have been updated since the 2nd edition, sloppy editing ruins the book. Maps are not on the page indexed and are not on the page referred to in the paragraph. You'd really expect better editing and not just #2 regurgitated with add-on info.3) Many of the contributors also have their own Dive Guide/Book published, so you may find some duplicate info.4) Doesn't list all major dive shops in the area, (but it comes pretty close). Doesn't list dive shops on the smaller islands (not even reputable ones).5) Publishing company extremely rude (Periplus Singapore) and unhelpful to the public when called at the number listed.

PROS:1) Maps of the entire region are very helpful especially if you want to be sure whether you are diving island 3 or island 4a. & your dive guide doesn't know - unfortunately happens more than you think since everyone wants to do their divemaster/instructor training course here. Just show the boat captain the map and he'll tell you.2) This book packs a lot of detailed info on each and every area and dive site. All you need is a Guide that knows where the fish are and how to get back to the boat.3) This book often contains more pertinent and detailed info than many "single area" books out there.4) All the contributors are highly respected and very well-known in their own

areas and beyond. Most are regular contributors to dive magazines and have their own guides published. Some still take groups out despite owning their own dive shop, travel agency, internet cafe, Tshirt stand, satay and fruit juice stall.5) Good quality photos and paper.6) Nice map of the region inside the front cover.Overall one of the better dive books out there. You will find this one really helpful for:\*Planning dive trips in S.E. Asia\*Knowing where you are\*What to look out for at a site/area\*Alternative dive resources for S.E. Asia (Lists of websites diving & otherwise).
