This is a nice addition to your travel books on South Africa. I ordered the book since it had such section on Kruger National Park. The section we read was only a few pages so if you are ordered just for Kruger it will not be that complete. The section though on Johannesburg is very good and has a lot of good information. I am not at all familiar with the "Footprint Focus" books. This will be a nice small booklet that we can take with us. There are a few maps in the book however no pictures. There is a lot of information on where to stay and what to do in the areas covered by the book. It is inexpensive.

This is a great book. Explains the park very well. Give a lot of details and tells you what is best to do while there.

I bought it for a young person about to move from the US to Josi for a year. It is lightweight, which was important. The info was good, and it was recent enough to be reliable.

The book has basic information that will be of help to the average tourist. But I am very disappointed that the maps that are listed in the Contents (and which were one of the reasons I bought the book) are NOT included in the download on my Kindle from - I feel cheated by that and am therefore unhappy with the purchase. If I'd known I was only getting part of the book and not the complete text I would not have purchased it.
