## Customer Reviews

It's a decent biology book for high school students. Some of the humorous attempts are going to become a little cheesy with time, but the information is presented in a teen-friendly manner at least. I generally teach in an order that is fairly close to the order of the chapters in this book, however it's not exact so I deviate a little. What I love most about this book is the resources that are available to go with it. There are worksheets on a variety of levels and they are all tailored to fit each individual section.

Easy to understand diagrams, clear language with little fluff. Very interesting discussions about genetics, DNA, and cellular biology. I just purchased this book for my own learning, not as part of a class, and I was very happy with what I have learned so far. A great introduction to the world of biology.

It was a book needed to replace one for my daughters High School. I was hoping to get something that wasn't too bad however, I was pleasantly surprised to see the great condition of the book and the lady in charge of the bookstore was very happy to see it was in such good condition. And of course the price was excellent thank you very much.

Good for high school

Good condition

I got this book because it was suggested by one of my education teachers that I get a text for the content I'll be teaching to help writing practice lessons for her class. So I went to my old HS and asked what they used and the teacher seemed to love this book, I however have not spent much time with it and therefore cannot give a full evaluation. I can say, however, that the content is good and straight forward; there is no confusion or jumping around

Looks so inviting - my daughter and I are eager to start using it in the fall. There is a workbook and workbook teacher key associated with it (Reading and Study Workbook A) which I ordered separately.

Was a tad frustrated when we got the book. I guess it really isn't important to mention in the title it is a teachers edition. It is in small print. So frustrated I feel like I got took
