# Finding A Financial Balance: The Economy Of Mexico (Mexico: Leading The Southern Hemisphere)

## Synopsis

Over the past two decades, the Mexican government has signed free trade agreements with the United States, Canada, the European Union, Japan, and many countries in Central and South America. These agreements have helped establish Mexico as a key exporter of goods to other countries, and have helped to stabilize the country's economy. Today, according to the World Bank, Mexico has the world's 14th-largest economy, with the country's annual gross domestic product valued at more than \$1.25 trillion. *Finding a Financial Balance: The Economy of Mexico* provides information about Mexico's manufacturing and industrial sectors, agriculture, natural resources, and tourist industry. It describes problems that the nation faces, such as Mexico's crumbling infrastructure and the vast economic disparity between wealthy and poor citizens, and how the Mexican government has begun to address these problems.

## Customer Reviews

Gr 5-8-Quality in this attractive set is uneven. People, History, Cuisine and Sports are the best of the group, with clear prose and enough details to help readers understand their subjects. Others attempt to cover too many topics, resulting in dry, superficial paragraphs that are often little more than lists of places and events. Only the titles on the Mexican states have (inadequately detailed) maps, a serious flaw when all books discuss numerous locations and geographical features. These

volumes have numerous colorful photos, but some look like stock images, and their subjects don't always correspond with accompanying text. Sidebars, glossaries, and reading comprehension questions and research suggestions supplement the texts. These books are better suited to support extensive units on Mexico rather than run-of-the-mill country reports, and even for those programs, superficial coverage and map and illustration weaknesses make them additional selections.
