# Taxonomy Of Flowering Plants

## Synopsis

Classic textbook first published in 1959 and updated in 1967, *Taxonomy of Flowering Plants* was created to provide a factual and simplified account of basic principles needed by beginning students in a course in taxonomy together with illustrated descriptions of more than a hundred families of flowering plants representative of the North American flora. The text assumes that the students have had some introduction to plant science. It is intended for undergraduate students in the study of agronomy, range management, forestry, wildlife management and conservation. The text is divided into three parts: Part I, dealing with historical and theoretical aspects and with terminology and morphology; Part II, dealing with orders and families of monocotyledons; and Part III, dealing with orders and families of dicotyledons.

## Book Information

Paperback: 484 pages

Publisher: Blackburn Press; Second edition (October 20, 2008)

Language: English

ISBN-10: 1930665725

ISBN-13: 978-1930665729

Product Dimensions: 6 x 1 x 9 inches

Shipping Weight: 1.2 pounds (View shipping rates and policies)
