Customer Reviews

“Critique: A standard and very highly recommended textbook for veterinary school and academic library veterinary studies curriculums and reference collections, "Blackwell's Five-Minute Veterinary Consult: Canine and Feline" will prove to be an essential, enduringly popular, thoroughly 'user friendly' in content, organization, and presentation, and an immanently practical reference for veterinarians and veterinary clinics.” (Midwest Book Review, 1 December 2015)“The book has a companion website, which can be accessed by a password provided at the time of purchase. The best feature of the website is the 354 client education handouts. These handouts are

fairly extensive and are generally 3 to 4 pages long. They can be altered prior to printing, which is helpful because not all information provided may be relevant to a particular patient." (Journal of the American Veterinary Medical Association, 15 June 2016)"....I found it the most comprehensive quick-reference book on canine and feline medicine. A must-have for every companion animal practitioner! Above all for those who prefer a book in their hands instead of an often distraction online research" Katia di Nicolo, DVM (EJCAP 2016)

Lists alternative differentials plus multiple treatment options... the alternative differentials and how to rule them out has to be my favorite. Nicely organized and easy to read.

I'm a vet student and got this when I noticed that all of the clinics and shelters that I work in have a copy. Love the newer edition. Easy to use and helpful for looking up conditions that the docs are seeing when we haven't covered it in class.

Good reference book in vet practice.

Great price. Really fast shipping.

I have always loved how easy it is to use this book

excellent book to have in your veterinary practice

Excellent a bulk of useful information and charts. Only issue I had was it should have a more detailed index rather than A-Z lookup system.

This is a must have for any library!
