Customer Reviews

My Masterpiece Adult Coloring Books offers coloring books for grown-ups in a variety of different styles and topics. Create your own masterpiece while you relieve stress, unwind, and have some fun!

Great, intricate designs and lots of pages to choose from. However, you will not be able to use markers with this book. Only ink pens or colored pencils. I tried several different types of markers and they all bled across the lines of the designs, preventing a clean finished look. I prefer to use markers for coloring Mandalas, as I think it gives it a more solid, clean look, but I was very

disappointed to discover that I cannot use them with this book. You might be able to use markers for the thicker-lined designs, but definitely not for any of the others. I feel that this should be posted within the item description, to warn buyers ahead of time. I included a photo.

I was very impressed with the quality of this Mood Enhancing Mandalas Coloring Book. I ordered 2 one for myself and one for my mother to gift for Christmas. She loved hers as well. We've both recently gotten back into coloring as I now have a 4 year old daughter and it's something we can both do together with her as she's learning to color in her own coloring books. She feels like we are spending quality time together and we are all relaxing doing something amazing. I was drawn to this book because of the Beautiful Mandala on the cover and I wasn't disappointed by the contents. I have a video to go along with this review and I will show you some of the pages but to protect the book maker I won't show them all (there needs to be some surprise, lol). I've used colored pencils as well as gel pens in this book and both work well so far. The pages are printed on nice high quality bright white paper. If I counted correctly there are 50 different pieces of art in this book for coloring. And a wide variety of patterns. It was well worth the money I spent on it and I feel it was much better quality than the books I've seen locally in stores for sale for \$3-5 more than this one was selling for. I also love that My Masterpiece Coloring invites us to post our finished pages to their website. I highly recommend and love this product. *I paid full price for 2 of these books and am using one for personal use and gifted the other. My review is based on my use of the product.

Designs weren't as great as I expected but it is a range of mandala options. Most will have to be done with colored pencil as the details are too tight for ultra fine tip gel pens. If you like to color each section the same color it wouldn't matter but if you are interested in doing more intricate designs, these are good just done too tightly to color with the mediums I like (ultra fine sharpies, gel pens and colored pencils). I prefer coloring books where I can color each piece differently. This one has some that are like that but not many.

Lots of very nice designs in this book. Some intricate, some not. But if you use certain gel pens or markers they will bleed through the page. Fortunately there are one or two blank pages at the back of the book that can be torn out and used as a blotter. The pages are not perforated, but that really didn't bother me.

I think this is a nice book. It is not elaborate in any way yet it has a great variety in design and

intricacy. Many 'mandala' books have repetitive patterns and style, which seems to be one big book of the same thing on every page. This book does not contain the same type of design throughout; different line thickness, different styles and degrees of detail make this book interesting and unique. It also is a great value for around \$5.

I love, love, love these coloring pages. I just wish they were perforated to make them easier to remove. The book is thick, and the pages are very substantial, but in order to be able to color the entire image, I need to remove them, and I end up with a very raggedy edge. But the images are so beautiful and fun to color that I hated to deduct a star for that...

I love this coloring book for the price it's definitely well worth it. The designs are amazing and you have a range of different detail. Some pictures are more detailed and others are simple. Some pictures also include thinner lines and others have thicker lines. The paper is a nice texture which makes the colors come off more vibrant especially if you are using crayons. The paper is also thick enough to if you were using gel pens it wouldn't bleed through.

my only complaint is that the pages are not perforated, so you need to tear them out slowly or cut them. the designs are really nice and most of them are quite detailed. paper is sturdy. so what to do with 50 beautiful designs when you finish ? I lamented some and used them for the cats' placemats ***** laminated some cut them decorated with foil stars glitter crystals and taped them onto my god-daughters school folders (don't think they will get lost in the crowd !) and finally used them to wrap gifts when I ran out of paper. A small metallic bow curly ribbon, whatever !! Enjoy Verified Purchaser
