# The Complete Guide To Alzheimer's Proofing Your Home

## Synopsis

Written by a practicing architect and gerontologist, *The Complete Guide to Alzheimer's-Proofing Your Home* shows you how to create a home environment that will help you cope with the many difficulties associated with Alzheimer's. This unique book is divided into two sections to provide the most thorough coverage available. Section One deals with interior and exterior spaces individually, providing key information on how to ensure that the Alzheimer's patient will be safe and secure. Section Two gives a detailed list of potential problems related to Alzheimer's and practical information on how to cope with those problems in the home setting.

## Customer Reviews

Loving care at home is the most desirable situation for many Alzheimer's sufferers and their families, but it is difficult to realize. Warner's thoughtful book aims to help by showing how to make a home more navigable, comfortable, and just plain livable for the Alzheimer's patient. Nicely presented and well illustrated, the book deals with rear

Mark Warner is one of the nation's foremost authorities on modifying living environments to accommodate the needs of seniors suffering from age-related illnesses and conditions. He is a registered architect certified by the National Council of Architectural Registration Boards and author of the highly acclaimed book *The Complete Guide to Alzheimer's-Proofing Your Home*, now in its second edition. He is a member of the American Institute of Architects, American Society on Aging,

the Alzheimer's Association, the Alzheimer's Community Care Association of Palm Beach and Martin Counties, and the Florida Council on Aging.

This is a big but really useful book. It can be hard to read any book like this as it brings home another side of the impact that Alzheimers will have, but worth reading before you need to change things rather than waiting for an accident. I just changed some of our furniture to make it safer (eg. we had glass coffee tables) and am glad I did this while my husband is still well enough to absorb the change easily. Many things I need, like locks, window guards, door alarms, I get from baby-proof stores/departments as this can often be the best value; moreover, many of the baby-proof things are easy to remove (like locks on fridges), I guess because there's an assumption that the child will grow up so you won't need the baby-proofing forever.

I wish I didn't need a resource like this, but that said, this book provides a lot of very helpful information. The way the chapters are organized makes it easy to read cover-to-cover, or to look up topics on an as-needed basis. I especially appreciate the details regarding how a person's brain might be expected to perceive, organize, and retrieve information differently throughout disease progression. That has helped me to think proactively about ways to help my loved one.

This is a wonderful resource book - it has several of my favorite things a good resource book has to have. Great problem solving ideas for at home alzheimer's care, you never thought of before but wonder why you didn't. A fantastic table of contents, where under each chapter is listed all the ideas contained. And an extensive index in the back, so you have a second way of finding the particular problem you are trying to solve. In the book there are sidebars on each page that show the names of companies that sell the products they mention on that page (there's a list in back of book showing address and phone number of each company). Also suggested conversations for diversion/redirection are in sidebars. I really glad to have this book as a resource for me to help my clients. It's jammed full of ideas.

In almost perfect condition.

Have not had the chance to read it. But the topic is just what I need for information.

Dated material. Book should be de-circulated and or destroyed. New products and technologies

make many solutions obsolete. At least the written date should be noted.

This book is full of practical suggestions, for example, leaving the light on in the bathroom and nowhere else at night, to suggest to the person with Alzheimer's where he/she might want to go. This has worked well for us. Very helpful for anyone dealing with Alzheimer's, and wanting to plan for the future.

This book was excellent for suggestions for proofing a home as apposed to an institution. I recommend it for home caregiver.
