Wild Sea Creatures: Sharks, Whales And Dolphins! (Wild Kratts) (Step Into Reading)

Synopsis

PBS's successful animated show Wild Kratts joins the adventures of zoologists Chris and Martin Kratt as they travel to animal habitats around the globe. Along the way, they encounter incredible creatures while combining science education and fun. Boys and girls ages 4 to 6 will dive into this Step 2 Reader with the Kratt brothers as they activate their Creature Power Suits to swim with sharks, whales, and other wild sea creatures! Step 2 Readers use basic vocabulary and short sentences to tell simple stories. For children who recognize familiar words and can sound out new words with help.

Age Range: 4 - 6 years

Grade Level: Preschool - 1

Customer Reviews

Brothers Chris Kratt and Martin Kratt are zoologists by training who have built a family entertainment brand based on their enthusiasm for animals and their wild popularity with a family audience. Since founding their production company Kratt Bros. Co. in 1993, they have created and executive produced over 200 episodes of four successful television series: Kratt's Creatures, Zoboombafoo with the Kratt Brothers, Kratt Bros. Be the Creature, and Wild Kratts. They star in these programs playing themselves and are directors, scriptwriters, authors, and wildlife

cinematographers, ever in the pursuit of “creature adventure.”

My five-year old grandson is obsessed with the Wild Kratts. While he remembers everything he hears on the show and does not hesitate to share his knowledge, reading aloud is a different story. He loves being read to, but he does not want to read to us. I had high hopes that “Wild Kratts Wild Sea Creatures: Sharks, Whales, and Dolphins!” would help break down his resolve not to read aloud. The text of this book is interesting and informative. With the exception of Great White Sharks, each different creature is discussed on two facing pages. The print is large and easy to see; there is not so much text that it overwhelms a child reading the book. The illustrations look much like the animation from the “Wild Kratts” television show. “Wild Kratts Wild Sea Creatures: Sharks, Whales, and Dolphins!” is an excellent book with which to encourage young readers. My grandson has been willing to try reading this book aloud. It features some of his favorite PBS characters; it is short, but not too short; and, Martin and Chris “Activate Creature Power!”

This reader is interesting and educational. It combines fiction because they use their “creature powers” and a lot of non-fiction as it is full of animal facts. It isn’t a story with bad guys like in the show. The book is a collection of information about sea creatures. This is a level 2 reader, but it is an advanced level 2 reader due to content and length. For example, it has advanced words like “ordinary” and “tentacles”. It is 32 pages long and a challenge for a child that can read some of the simpler readers alone. This book can be a read-aloud until the child is ready to read on his or her own. The pictures look exactly like those in the show. The illustrations are clear and help the children make observations and be able to understand the text. Overall, this is an excellent book.

This book has some really big words for being a level 2 book. I bought this for a boy who struggles to read and there is no way he could read this on his own, and he is a level 2 in most other books. This book did have nice cartoons in the book

My son loves it!

Happy

My son loves animals. He loves the Kratt brothers as much as I did growing up and I still do. They will always be a favorite in my house when it comes to learning. They make it fun and interesting, even my two year old loves learning about animals. This book was a great read for my son's book report his teacher liked everything he had learned from reading this book.

My son wished it was written more like an episode instead of just learning about the creatures...no adventure = no fun for him.

My 3 years old like it, he said , "the book is too short"
