Customer Reviews

We crate trained a puppy 13 years ago and did everything wrong. We are determined to get it right this time around with our new 9-week-old Boston Terrier and after a week of yelping & crying ALL NIGHT LONG (by the puppy, my husband AND myself!) I was desperate. My four human babies, including a set of twins, were easier to sleep train! I am so glad I found this book and have now had three successful nights using the "light-sleeper" method. The puppy has completely slept through the night without even needing to go potty! My husband has been out of town for five days and is going to be shocked at the difference in our little Gidget's sleeping habits when he gets home!! The only reason I didn't give this book five stars is because I wish it had included some additional non-sleep related crate training tips. However, It is an easy 30-45 minute read and has really good ideas to try for your little sleep monster. Good luck!!

I transitioned my puppy from paper training to crate training, so I bought this book to help ease the process. Luckily for me it went pretty fast, since my pup was able to sleep through the night already. I did get up in the middle of the night when he started spending the night in his crate to make sure he didn't have any accidents, but I was able to move the intervals of time up quite quickly. This book is a great resource!

If I could give this more than 5 stars I would! Clear and concise advice. I have been struggling for a month to get my pup to sleep through the night. I read this cover to cover in less than an hour, implemented one of the methods and also learned what I was doing wrong. I now have my pup on a set schedule so everyone is happy!! Highly recommend!

Thank you for this book. As a first time puppy owner who wasn't prepared, it really got us on track right away and in just one day, we were on a schedule that worked! I recommend this light read to anyone who needs help right away and doesn't have much time to prepare.

This is one of the most helpful and efficient dog-training guides I've found so far. And it works! I used the "alarm clock" method to potty train my 2-month-old pup and by 4-months we were all sleeping peacefully through the night.

We are using the light sleeper method and after 1 week she is only waking up once during the night. Being at bed height in her crate made all the difference. Great quick read with easy to follow guidance.

okay, nothing i didn't already know

Short, easy read! Great advice for anyone with a brand new puppy! We were sleeping through the night in no time!
