Customer Reviews

I purchased this log as a birthday gift for my best friend's Dad who for some reason is way too into auto logging. I will let him review it in his own words: "I've been keeping logs on my vehicles for 35 years in regular note pads and this is the first dedicated auto log I've ever owned. It makes me wish I had purchased it 35 years ago. After using this log, I realize that is one of my great regrets in life. The features are exemplary. I can log everything needed. I am most excited about the elastic strap around the outside cover that keeps the book shut. It keeps the pages from getting damaged in transit. The size of the log is perfect. It fits handily in my glove box. In conclusion, I could not recommend this more to anybody that is serious about automotive logging." - Larry C. (Dictated, not read.)

I got this book after my dad showed it to me, I love keeping up with my car and documenting everything I do and this book is perfect. Has just enough room to leave notes, everything is laid out

nice. You can use this book to keep track of trips, fuel mileage, maintenance, and there is even room to make yearly summaries in the back of the book. Overall I would buy this book for any car I own to keep track of anything.

I was pretty disappointed to find out that only 12 out of 144 pages were dedicated to repairs and maintenance. This gives you room for 33 repair entries and 33 maintenance entries. Not enough for someone who works on their car a lot. The fuel log and trip log categories take up the majority of the book.

Keeps the mileage records at hand and well made notebook. Makes my husband happy for record keeping!

I am one that keep track of everything concerning my vehicles and this log fulfills the need to monitor the mileage and gas used.

Good size for in the glove box and has all the right spaces for keeping your records.

Everything like expected. You can write nearly everything in that book.

good product I recommend this seller
