Ninja Plants: Survival And Adaptation In The Plant World

Synopsis

What can communicate but has no mouth, and can attack but has no hands? A plant! You might love the beauty and fragrance of flowers, but plants are far more complex than meets the eye. Some plants have ways of luring insects for pollination. Others mimic the look of the female insects whose male counterparts they want to attract. The Venus flytrap eats insects and other small animals for extra nourishment. You might see some of these ninja plants with their sneaky and deceitful ways in your own backyard. These plants might even be sitting on a windowsill in your home. This fascinating world of ninja plants is waiting to be discovered.

Customer Reviews

"The book offers solid proof that, in spite of their unobtrusive existence, plants can be ninjalike and are more sophisticated in survival than most people realize." --Booklist "[An] unusual invitation to young readers to look closely at the plant world. . . . An interesting take on a subject not often covered in books for middle school and teen readers." --Kirkus Reviews "The catchy title is sure to attract readers. . . . [Consider] for collections in need of botanical materials." --School Library Journal
