Sean is an assistant professor of economics at Scripps College in Claremont, California. He is the author of the international best seller "Economics for Dummies" as well as the coauthor, along with Campbell McConnell and Stanley Brue, of the world's best-selling college economics textbook, "Economics: Principles, Problems, and Policies". An avid martial artist, Sean is a former Aikido national champion and has coached five of his students to U.S. national aikido titles. A recurring commentator on FOX Business, ABC News, and NPR, Sean holds a B.A. in economics from the University of Southern California and a Ph.D. in economics from U.C. Berkeley, where he completed his dissertation under the supervision of Nobel Laureate George Akerlof. Sean's research focuses on the often puzzling and seemingly irrational behavior of stock market investors, but he's also investigated topics as wide-ranging as the factors that affect customer tipping behavior at restaurants and why you see a lot of unionized workers only in certain industries. Stanley L. Brue did his undergraduate work at Augustana College (South Dakota) and received its Distinguished Achievement Award in 1991. He received his Ph.D. from the University of

Nebraska-Lincoln. He is a professor at Pacific Lutheran University, where he has been honored as a recipient of the Burlington Northern Faculty Achievement Award. Professor Brue has also received the national Leavey Award for excellence in economic education. He has served as national president and chair of the Board of Trustees of Omicron Delta Epsilon International Economics Honorary. He is coauthor of *Economic Scenes*, Fifth edition (Prentice-Hall), *Contemporary Labor Economics*, Seventh edition, *Essentials of Economics*, First edition (both The McGraw-Hill Companies), and *The Evolution of Economic Thought*, Seventh edition (South-Western). Campbell R. McConnell earned his Ph.D. from the University of Iowa after receiving degrees from Cornell College and the University of Illinois. He taught at the University of Nebraska-Lincoln from 1953 until his retirement in 1990. He is also coauthor of *Contemporary Labor Economics*, Seventh edition, and *Essentials of Economics*, First edition (both The McGraw-Hill Companies), and has edited readers for the principles and labor economics courses. He is a recipient of both the University of Nebraska Distinguished Teaching Award and the James A. Lake Academic Freedom Award, and is past-president of the Midwest Economics Association. Professor McConnell was awarded an honorary Doctor of Laws degree from Cornell College in 1973 and received its Distinguished Achievement Award in 1994.

Rental arrived as described in very good condition. No access codes though, you will need to purchase that separately. On the McGrawhill website it's 100 but on it's 70 so I recommend getting it on if you want to save 20-30 bucks. The book itself is a bit wordy but well organized and it goes really well the access program. All of the answers to the access questions/assignments can be easily found in the book. Graphs and pictures could be better explained though. I got very confused on questions that involved graphs and pictures because it was not explained with captions but had arrows pointing in different directions.

If you don't know anything about macroeconomics or if you are confused about it then this book will not be any help. Its waste of money. I need a book that will break the concepts down more because this subjects is harder for me. If I were you I'd invest my money in a more helpful book. My prof told me to get this textbook, but it did not help me at all.

Great book. I used it for my Macro class. The book is very accurate and teaches a lot about the basics of economics.

Needed for a class

Love it. Love it. Love it. I appreciate the online book, study materials, and quiz portion, as well. The book is informative, more instructive for degree seeking students.

perfect condition

It goes into detail about the topics. I don't really use it for my class because we mainly focus on our notes, but when I need to find a specific answer or clarification on something, then the book does a good job with that.

Its used so it doesnt look brand new but besides that seems to work well enough to go along with my online class.
