Zoologist Jim Kavanagh has made a career out of introducing novices to plants, animals, the

sciences and world cultures. In addition to creating over 500 simplified nature guides, he has also authored guides to languages, cities and outdoor skills. An avid traveler and backpacker, Kavanagh's path has taken him around the world to many remote destinations including the upper , Africa, Australia, and the Arctic Circle (and this is just the As). He is also the author of a series of state-specific guides to common species and natural attractions and a children's book on evolution.

I got this for my mom, and although she loves it, she's a little disappointed that it doesn't mention turkeys. She knows a flock of turkeys that frequent her backyard. They all have names and only speak Spanish (fortunately she's fluent, so they have long conversations), but she was hoping to learn a little more about them. On the upside, relations with the Asian Collared Doves are improving greatly since she got the pocket guide. I'm not making this up. *sigh*

This pamphlet is an excellent resource to identify birds while hiking or camping. It's sturdy and light to carry along for quick reference.

We were expecting more than one (1) plastic covered piece of paper folded four ways. The product is VERY overpriced.

Quick and easy to help identify birds for the beginning birder.
