My doctor won't let me use this book because it has so many carbs in the recipes. This is no book for even me a borderline diabetic. I can't eat pasta, bread, sugar flour etc and this book as all of that

in it :(

I was expecting to see more recipes that had a better carbohydrate to protein ratio in this cookbook. I was surprised to see recipes that were as much as 90% Carb to 10% protein - not good. There are a couple of recipes that look really interesting, but most I feel like have seen before in other books.

I've tried many of the recipes in this book and they were all good. It's really helpful to have a book like this when you run out of meal ideas and want something a little different.

Carbs in these recipes are far too high for my taste.

Badly in need of an editor, and the recipes really aren't anything special.

This is an excellent book . Recipes are delicious

I just received the book. It came later than the date stated it would arrive. The book itself doesn't make much sense since it is supposed to be for diabetes yet is full of pasta recipes which make the blood sugar skyrocket. If your looking for a vegan/diabetic cook book this is not the cookbook!

GREAT COOKBOOK. I have many cookbooks but this one is so family friendly! Easy recipes that adults and kids alike enjoy.
