# **Astronomy: The Heavenly Challenge**

### **Synopsis**

As optics improved, man began to see the solar system. Tycho Brahe in Denmark, Nicolaus Copernicus of Poland, Johannes Kepler of Germany, and Italy's Galileo Galilei all began to see a new relationship between the world and the stars. Their questions, and their non-religious answers, toppled the idea that man--and the Church--are at the center of the universe. The Science and Discovery Series recreates history's four-thousand-year journey of scientific progress. Science has often challenged and upset conventional wisdom. This is a story of vested interests and independent thinkers, experiments and theories, change and progress. Aristotle, Copernicus, Kepler, Galileo, Newton, Darwin, and Einstein all make appearances. --This text refers to the Audio CD edition.

#### **Book Information**

**Audible Audio Edition** 

Listening Length: 2 hours and 52 minutes

Program Type: Audiobook

Version: Unabridged

Publisher: Blackstone Audio, Inc.

Audible.com Release Date: July 24, 2006

Language: English

ASIN: B000H5TU1S

Best Sellers Rank: #81 in Books > Audible Audiobooks > Science > Astronomy #2769 in Books > Science & Math > Astronomy & Space Science > Astronomy #6133 in Books > Science & Math > History & Philosophy
