## Customer Reviews

The book is being used in a dimensions of professional nursing RN to BSN program. One section, written by Sister Rosemary Donley reads like the Democratic Party manifesto about healthcare reform. She does not express any opposing viewpoint. Lots of worthless fluff in this book too. I feel like this book jumps around, starting with dealing with your professional career and ending up discussing politics. Will this advance my career in professional nursing....I don't believe so. Like most textbooks this will not be included in my professional library.

It's surprising that a book in its fifth edition would have so many typos. This book was required for a

class in an RN to BSN program. Having my BSN will let my career advance, so to that end I would say that this book delivered on its title. So far as textbooks go, this one one was pretty informative. However if I could do it over again, I would have purchased the fourth edition instead.

This book is far more dry than it has to be. The information is fairly generic and hasn't really helped that much with in class discussions. A lot of the chapters feel as if they would have been more appropriate at the length of a single page. Unfortunately I suspect most people buying it have to buy it because of a class.

This was a required textbook for my RN-BSN program. I've read a lot of college-level textbooks and this book seemed like it was trying too hard to sound scholarly, if thats possible. Yes, there was useful information but it was presented in what I felt was overly-wordy language that detracted from the actual material and made it difficult to get through.

long and extremely boring, hard to read.

Had to buy this for class. It was a difficult read. Actually stopped trying to read it because the instructor did not refer to it very often. Avoid buying this at all cost. Once again, it was a very difficult read.

PhD = piled higher and deeper? Push here dummy? Permanent head damage? Be prepared to spend painful hours trying get through each paragraph.

Bought for nursing class for my BSN and I did use it occasionally throughout my program.
