It is still arguably the best. And it is indisputably the most popular. "Fast

I have the full book and worked through it cover to cover 15 years ago. I have both the workbook and the latest edition of "Parachute." I'm finding that I'm taking shortcuts and not getting as much out of the process if I use the workbook. Stick with the full version.

I bought this workbook after resigning from a 3-year teaching career. Each chapter and activity included in the book helped me to discover or confirm various aspects of my character and work strengths, along with career goals. I recommend this workbook to anyone contemplating, researching, or beginning a career change!

Lots of great exercises. I love it because I don't need the full book. It's a good size and easy to use.

A must read even if your not actively looking for a job. If your unhappy with your work and don't know why, read this. If your happy at work, but want to sharpen your self awareness, make yourself more promotable, read this.

Although I am not writing in it, because thing change over time, I am using post-it notes and enjoying what I see. Also, using a detailed Microsoft Word document to further examine what my mission will be. I have reinforced that my passion is Business Administration.

Needed this book for a class. Not very helpful when it comes to job hunting. More of a psycho-analyzing self help assignment. You are suppose to discover who you are through the various exercises. Not really my think.

I like to share this book with my college mentees as they have online exercises that help them define WHO they are and WHAT they are attracted to. I've used "Chute" since the 1980s on myself

3x changing careers.

I felt that it was a little unrealistic. We all can't love our jobs. If you have to make money sometimes you've got to come down to reality. I knew a lot of what the book already told me.
