## Customer Reviews

We just returned from Barcelona and used this wonderful guide to explore the city. The book begins with about 20 pages of general introduction to Barcelona and then gives 5 walks, separated by area: El Barri Gotic, Sant Pere and La Ribera, El Raval, Gracia and L'Eixample. Each walk takes about 3 to 4 hours (longer if you stop at recommended restaurants and attractions), and are as good as having a private walking tour. There are lots of interesting little stories about the city, the buildings and the people. We've used many of the books in this series and found BarcelonaWalks not quite as intimate and charming as others, but still very good. Also the book is getting older now so it is less reliable when it comes to restaurants and other venues, but we still enjoyed these walks very much. Each section contains a map (which does not name all the streets, which can be problematic) and a few black-and-white photographs.

I love this walking series. They may have been published a long time ago, but most of these places haven't changed that much since. They provide great insights into the streets you are walking down that you won't find online or in a country based travel book.

As much as I have enjoyed the other books on Barcelona that I have read, nothing has brought this spectacular city to life in quite the same way as *Barcelonawalks*. I went on the walks with a native who knows the city so well she can get navigate the labyrinth of the Barri Gotic with her eyes closed. The book was a revelation even to her. George Semler, the author, brings considerable reserves of insight, style and wit to the proceedings. As a book, it's a wonderful confection. As a guidebook (a recipe I don't ordinarily care for since they often do to their subject what the Kraft company does to cheese), it is more like private tour with someone who knows the broad arch of the city's rich history, the character of it's people, as well as a baroque quantity of entertaining minutia. Semler's restaurant recommendations alone might be worth the price of admission, as you are likely to find yourself the only tourist in various characteristic and popular neighborhood eateries.

George Semler has told as much about the passions of the people of Barcelona as about its buildings. From the medieval splendor of the Gothic Quarter through the 19th neighborhood of Gracia to the wildly idiosyncratic buildings of the Catalan Renaissance, each block is revealed not only as a sequence of architectural structures but as the place where the great and the ordinary people of Barcelona fought, dreamed and struggled. I walked every one of its routes with pleasure and a great sense of history. Marvellous!

*Barcelonawalks* is the best guide book I have ever come across. It allows you to explore the old city without the pressures of a tourist guide, introducing you to history that you would never uncover on your own.
