Synopsis

Luke Baker is an adventurous drug user fresh out of high school. His life takes on a new sense of purpose upon his discovery of research chemicals. MDPV, an amphetamine-like chemical, seems to be his ticket to success. The drug proves to be extremely addictive with psychotic fear-inducing side effects. This is a story of that addiction and the struggle for recovery.

Customer Reviews

Difficult read but also a must read to understand the extreme toll these designer drugs are taking on this generation. When I say difficult, I mean in the way that most cannot possibly understand the horrendous damage these drugs are doing to our children and young adults. To be informed through seemingly real life experiences give the reader a full perspective of the dangers. Read it it for your kids and your neighbors kids. Bravo to the author for fighting the battle...winning..and sharing his insights.

Very insightful look into the world of designer drugs and the toll they can take on one's life. This book kept my attention throughout and gave a new perspective on drug use and abuse. A must read before your children enter high school.

I couldn't stop reading this..give it a chance, it's written very well! I wish the author well, and wish his story ended better.

Shipped fast! Captivating read. Couldn't put the book down!
