# Primate Parasite Ecology: The Dynamics And Study Of Host-Parasite Relationships (Cambridge Studies In Biological And Evolutionary Anthropology)

## Synopsis

Anyone who has spent an extended period in the tropics has an idea, through caring for others or first-hand experience, just what it is like to be a primate parasite host. Monkeys and apes often share parasites with humans, for example the HIV viruses which evolved from related viruses of chimpanzees and sooty mangabeys, and so understanding the ecology of infectious diseases in non-human primates is of paramount importance. Furthermore, there is accumulating evidence that environmental change may promote contact between humans and non-human primates and increase the possibility of sharing infectious disease. Written for academic researchers, this book addresses these issues and provides up-to-date information on the methods of study, natural history and ecology/theory of the exciting field of primate parasite ecology.

## Book Information

Series: Cambridge Studies in Biological and Evolutionary Anthropology (Book 57)

Hardcover: 548 pages

Publisher: Cambridge University Press (March 23, 2009)

Language: English

ISBN-10: 0521872464

ISBN-13: 978-0521872461

Product Dimensions: 6 x 1.2 x 9 inches

Shipping Weight: 2.2 pounds (View shipping rates and policies)

## Customer Reviews

"This volume provides a comprehensive look at the relationships between primates and their parasites. Overall, this volume is a summary of the current research being conducted in the field of primate parasitology. The combination of traditional studies and newer concepts should provide cogent information for researchers and professionals across the varied areas of primate parasitology." Sara K. Martin for *The Quarterly Review of Biology*

Monkeys and apes often share parasites with humans, so understanding the ecology of infectious

diseases in non-human primates is of paramount importance. Written for researchers, this book provides up-to-date information on methods of study, natural history and ecology/theory of the exciting field of primate parasite ecology.
