# Biology: The Dynamics Of Life

## Synopsis

Biology Dynamics of Life ASIN: 0078299004

## Book Information

Series: Biology: The Dynamcis of Life

Hardcover: 1190 pages

Publisher: McGraw-Hill/Glencoe (June 1, 2005)

Language: English

ISBN-10: 0078299004

ISBN-13: 978-0078299001

Product Dimensions: 11 x 8.6 x 1.7 inches

Shipping Weight: 6 pounds (View shipping rates and policies)

Average Customer Review: 4.5 out of 5 stars 31 customer reviews

Best Sellers Rank: #216,782 in Books (See Top 100 in Books) #59 in [Books > Teens > Education & Reference > Science & Technology > Biology](#) #9154 in [Books > Textbooks > Education](#) #15465 in [Books > Education & Teaching > Schools & Teaching](#)

## Customer Reviews

Biology Dynamics of Life ASIN: 0078299004

I bought it as my son uses it for his Biology class and I wanted a copy for myself to read along. The book comes with URLs to online materials, which is great. The explanations in this book are good and clear, but, just like any other textbooks, they could improve. It does say "California" edition, but it was essentially and functionally the same with the one that doesn't say that.

GREAT HELP FOR THOSE TAKING HONORS BIOLOGY. IT HAS A HUGE LIST OF VOCABULARY WORDS. USED BY HIGH SCHOOL BIOLOGY TEACHERS.

Good information and layout

Offering sufficient info.

The book was as described, and arrived on time.

I have the 2004 version of the textbook. The table of contents is very informative. It points out the pages that touch on other courses (earth science, health, social studies, chemistry, math, physics, literature), and has separate pages listing the different types of labs (bio labs, mini labs, problem-solving labs). I bought their lab manual which has different experiments than the textbook so we wouldn't have to write everything out in a lab journal, but you wouldn't necessarily have to have the lab manual to complete labs. There are more than 100 labs in this book (not including the problem-solving labs which are activities like making graphs and analyzing data). While some labs included in the text require lab supplies you might find in a high school lab, some can be done using materials from your local hardware store. The photos and graphics are in color and the text is interesting to read. Each section has a list of vocabulary in the left column and the words are clearly defined in the text. It summarizes what the student will learn in the chapter and why it's important. The chapters end with assessment questions and a page of standardized test practice. The answers to these assessments are in the teacher's edition of the textbook. There's also a teacher's edition of the lab manual which has the answers to the labs, and a teacher's edition science notebook which contains the answers to the student's science notebook. Overall, a very well done series. Item was well packaged and arrived quickly.

no problems

Excellent
