"The fun side of good oral health habits." -- American Dental Association News --This text refers to an out of print or unavailable edition of this title.

Very cute pop-up book, but my child is more interested in taking the shark's floss off the page, ripping out the moveable but very cute parts (such as a paper toothbrush attached to a string). It would have been better to buy a board book that is durable.

I believe that my son is the most difficult child in brushing his teeth, he used to cry and scream every time we brush his teeth, and he would never touch the toothbrush with his hands. I started to search and I bought this book + Elmo book : ready, set, brush + Dazzlepro musical teeth brush + StarSmiles

elegator that has teeth to teach children to brush. To be honest the most effective things was THIS BOOK + Dazzlepro music teeth brush. I had take a vedio for this book to upload as a review but the suprise was that my son wold always take my mobile to see this vedio when we are out home. This book realy work and motivate little kids. Imagine that one time my son went to his room and started to brush his teeth with dazzlepro music teeth brush without any help! even no one asked him to brush his teeth! This transformation in my son is because THIS BOOK + DAZZLEPRO

I don't want to speak too soon, but thanks to this book, we've gone 7 days straight with good teeth brushing and no fights from our 18 month old! She has had all of her teeth since she was 12 months old (started getting them at 6 months) but hasn't let us brush them without screaming, squirming, knocking the brush away, etc. for the past 8 months! We've tried all the tricks but none even worked once. But she loves this book. We even have to put it away during the day because if she sees it, she asks to brush her teeth. I can't believe it! The way we use it: she sits in my lap and we brush the animals teeth with the book brushes while Daddy brushes her teeth. Then we let her brush her own teeth. Of course, it's a pop- up so we've already had to make some repairs but I'll cover the whole book in tape if it means we can finally brush her teeth again!

This is a great beginner book for children that LOVE hands on reading. There are toothbrush manipulatives throughout the book that allow your child to brush animals teeth. Awesome illustrations and colors. So much fun and a unique item for parents who want interactive learning materials for teaching basic hygiene skills to their little ones. This is a keeper for sure.

This book helps teach proper tooth brushing techniques and makes flossing seem more fun. My son is doing better at both now which is why this book gets 5 stars.

My son is obsessed with this book! He reads it EVERY night while he WILLINGLY brushes and flosses his teeth. This book ROCKS!

I cannot say enough about this book. The book actually has a pop-up animal's mouth on every page and a movable tooth brush on each page as well. Each page lets you move the toothbrush a different way and one page even has a sturdy board book toothbrush attached by a string that you can use to brush the teeth of the lion. Another page has a big shark mouth with strings to floss his teeth. My 2 y/o would not let me brush her teeth. She loves to "brush" her own teeth, which consists

of ineffectively moving the brush around and sucking the toothpaste and water off the brush. She would scream and have a fit when I tried brushing her teeth. Bribing her with a potty DVD helped but what has made the task even more manageable and even fun is this book. Whenever we go to brush she requests that I read it while she brushes and then she lets me brush her teeth. The best part is that she is getting better at brushing her own teeth bc, thanks to this clever book, she is able to see and understand what she is supposed to do. I just have to remind her get those back teeth like the hippo. And of course the fact that it's animals keeps her totally engaged. So clever, thank you to Reader's Digest for an invaluable book!

This is a great book to encourage teeth brushing! And the pop-ups are really cool and interactive.
