great

This is a terrific book for up-and-coming authors who insist on changing with the times. Andrea clearly defines the reasoning for the rise in transmedia, as well as giving splendid examples how this method works. In addition, she instructs clearly on how to follow through by publicizing your own work to be recognized and devoured by the public.

Great!!

A fantastic intro to the world of transmedia! The interviews with professionals working in the field are particularly helpful!

Very good resource for creators of all types, leans a little bit towards a particular type of transmedia that the writer is likely more familiar with however explains methodically the do's and don'ts of any style. Most importantly covers logistical, organizational and budgetary considerations in creating transmedia narrative whilst always relating back to the story and the impact on audience, pointing out a huge lot of things that someone coming from story telling in just the one medium would never have even considered. Only criticism would be that there are a few contradictions/statements that make you wonder why that section was in there anyway. e.g. explains over the course of a page the narrative principle of 'Chekhov's gun' and how it's useful, however finishes saying it doesn't as much apply to transmedia as it does traditional narrative "And once you move into transmedia, you might be better off forgetting you ever heard Chekhov's name at all"

great reference

This is a great read and solid overview. Definitely worth reading!

After following Andrea on Twitter for quite some time, I bit the bullet and purchased her book for my Kindle. My mind was blown. I'm an independent filmmaker who works full time in the game space, and this fresh new approach to both my work and my play opened up avenues of creativity I'd longed for. The best part? It's not just all philosophy; there's nitty gritty how-to's, and how-did's (interviews with successful transmedia creators). Above all it gives you a road map for how to bring transmedia elements into your existing projects, or create new ones, in a compelling way.
