Amphibians And Reptiles Of Louisiana: An Identification And Reference Guide

Synopsis

This guide provides a means of identifying the 147 amphibian and reptile species currently known in Louisiana, as well as information on their natural histories (behavior, geographic range, populations, food and feeding habits, reproduction, and habitat). Written in a style that will be useful for both laypersons and experts, it will help those interested in the amphibians and reptiles of Louisiana appreciate our biodiversity heritage.

Customer Reviews

Jeff Boundy is a Herpetologist with the Louisiana Department of Wildlife and Fisheries. John L. Carr is a professor of biology at the University of Louisiana at Monroe.

a good, practical field guide with lots of useful diagnostic photos. I would like to see more detailed info on natural history and taxonomy, but its a field guide. an absolute must have for anyone spending time outdoors, naturalists, hunters/fishermen, and anyone interested in the reptiles and amphibians that occur in Louisiana.
