# ICD-10-CM 2017 Snapshot Coding Card: Emergency Medicine (ICD-10-CM 2017 Snapshot Coding Cards)

**ICD-10-CM Snapshot 2017**      **Emergency Medicine**

Pulmonary Coding Tip

If a definitive diagnosis has not been established by the end of the encounter, it is acceptable to report sign(s) and/or symptom(s) in lieu of a definitive diagnosis. When sufficient clinical information is not known or available about a particular health condition to assign a more specific code, the appropriate "unspecified" code (eg, a diagnosis of pneumonia has been determined, but not the specific type) (unspecified codes should be reported when they are the codes that most accurately reflect what is known about the patient's condition at the time of that particular encounter). The absence of the + (blast) symbol indicates that an additional digit is needed. For example, **Exacerbation of Chronic Bronchitis J43.9**.

<b>Coding Tip</b>	
Use additional code to identify:	
- exposure to environmental/tobacco smoke	(Z71.22)
- history of tobacco use	(Z87.89)
- occupational exposure to environmental tobacco smoke	(Z77.32)
- tobacco dependence-see Category F17	
- tobacco use	(Z72.0)

## Synopsis

The ICD-10-CM 2017 Snapshot Coding Cards provide commonly reported diagnostic codes and associated guidelines for a specialty. Pushpin icons help Snapshot users connect coding tips back to specific codes. These easy-to-use reference cards allow health care providers and staff members to quickly locate a desired code.
