# Culture And Psychology, 5th Edition

## Synopsis

This field-leading book puts psychological theories and concepts into a cross-cultural framework that invites readers to discover, question, and ultimately, understand the relationship between culture and psychology through exploration of topics like changing gender roles, sexuality, self-esteem, aggression, personality, and mate selection. It all adds up to a book that will leave readers with a deeper, more complex understanding of the nature of culture, its relationship to psychological processes, and the differences and similarities between cultures in the increasingly globalized world.

## Book Information

Hardcover: 524 pages

Publisher: Wadsworth Publishing; 5th edition (January 1, 2012)

David Matsumoto is a world-renowned expert in the fields of emotion, nonverbal behavior, deception, and culture. He received his bachelor's degree from the University of Michigan in 1981, double majoring in psychology and Japanese, and his Masters (1983) and Doctoral (1986) degrees in Psychology from the University of California at Berkeley. He has been a Professor of Psychology at San Francisco State University (SFSU) since 1989, and is the Founder and Director of SFSU's Culture and Emotion Research Laboratory. He has produced over 400 academic works, including books, journal articles, book chapters, and conference presentations. His books include well-known titles such as the *APA HANDBOOK OF NONVERBAL COMMUNICATION* (ed.), *NONVERBAL COMMUNICATION: SCIENCE AND APPLICATION* (ed.), the *CAMBRIDGE DICTIONARY OF PSYCHOLOGY* (ed.), *CROSS-CULTURAL RESEARCH METHODS IN PSYCHOLOGY* (ed.), the

APA HANDBOOK OF INTERPERSONAL COMMUNICATION (ed.), the APA HANDBOOK OF INTERCULTURAL COMMUNICATION (ed.), and THE HANDBOOK OF CULTURE AND PSYCHOLOGY (ed.). He is the recipient of many awards and honors in the field of psychology, and is a Fellow of the Association for Psychological Science and the International Academy of Intercultural Research. He is the series editor for Cambridge University Press' series on Culture and Psychology, and former Editor-in-Chief for the Journal of Cross-Cultural Psychology. He has been President and CEO of Humintell ([www.humintell.com](http://www.humintell.com)) since its founding in 2009. Linda Juang is a Professor of Education at the University of Potsdam, Germany. She earned her B.A. in Child Development from the University of Minnesota, her M.A. (1995) and Ph.D. (1997) in Developmental Psychology from Michigan State University, and was a post-doctoral fellow at the University of Jena in Germany for three years. She served on the faculty at San Francisco State University for 11 years. Her research focuses on adolescent development in family, school, and cultural contexts. She co-edited a handbook on Asian American and Pacific Islander Children and Mental Health and has published journal articles, book chapters, and presented studies concerning ethnic identity, discrimination, acculturation, and well-being of adolescents and young adults in the U.S., China, and Germany. She is a Fellow of the Asian American Psychological Association.

Great book, but can become boring if you spend long amounts of time reading it. I didn't notice it before buying it, but the cover says that it shouldn't be sold in the US. It worked just fine for the class that I was taking though. It brought up how much psychology is fake because it only focuses on college students in America. Tons of interesting topics that challenge modern accepted psychological facts. Overall this is a very interesting book about psychology. May not be good for someone who is just starting to learn about psychology because it barely covers the American studies.

I thought the perspective of the writer to be narrow on some issues and politically correct on other issues and not considerate of other aspects about behavioral displays.

Required for my daughters college class

Looks great. Last chapter was highlighted but other than that, it looks great.

This book was required for a course. The authors writing style is awful! I ended up reading the

chapter objectives, then researching using other sources. The concepts covered are important, but unreadable.

Great!

When I received this textbook everything looked amazing! It was brand new. There were no marks on it or in it .. I am very happy with this purchase

This is terribly confusing, at least for my style of learning. It provides SOME basics, some theories and concepts, and a LOT of studies. I like to have even amounts of both, but when an entire section is a cultural comparison based on previous studies, instead of telling me how to read and interpret these studies for myself... Or how to understand future studies, or contradictory studies, or anything at all about theory... Well. Bottom line: it's ok, but I'd much rather read something that's more scientific based and less, "well in the past we've found the Japanese babies are calmer than Chinese babies, who tend to be calmer than African-American or European American babies." Who cares?! Tell me how to do or read or understand these, and the basis of how the study was conducted!
