The Nature Of Florida's Ocean Life : Including Coral Reefs, Gulf Stream, Sargasso Sea, And Sunken Ships

Synopsis

This book looks at Florida's ocean as a habitat, a community of elaborate mini-creatures swimming next to bulky saltwater giants. Drifting alongside these living creatures are inanimate objects--bottles, nurdles, rafts, toys and tar blobs--lost or tossed from cargo ships. They float in the Sargasso Sea or flow with the Gulf Stream, sometimes drifting to Florida's east coast to become part of the sea wrack--the flotsam and jetsam that we find when strolling on the shore.

Customer Reviews

"We all love Cathie Katz' books and use them as reference in our programs and recommend them to our visitors." --Florida State Park Rangers
"The most charmingly informative books we've ever seen!" --Florida TODAY
"It's like taking a walk down the beach with a knowledgeable friend who has an unmatched enthusiasm for collecting." --Cy Zaneski, The Miami Herald

Cathie Katz has worked with the Johns Hopkins University/Applied Physics Laboratory at Cape Canaveral Air Station as their Senior Editor since 1987. From her home office in Melbourne Beach, Florida, she created The Nature of Florida series of books. The Nature of Florida's Ocean Life is the fourth in this series.

Great book from an excellent writer!!

Cathie's drawings are whimsical! Her writing is very easy to understand and so much fun to read.

Only wish she had time for more books but I will enjoy the ones she did write.

nice drawings good facts checking
